Flex 230VAC AC Controller for AC Motor

Flex 230VAC

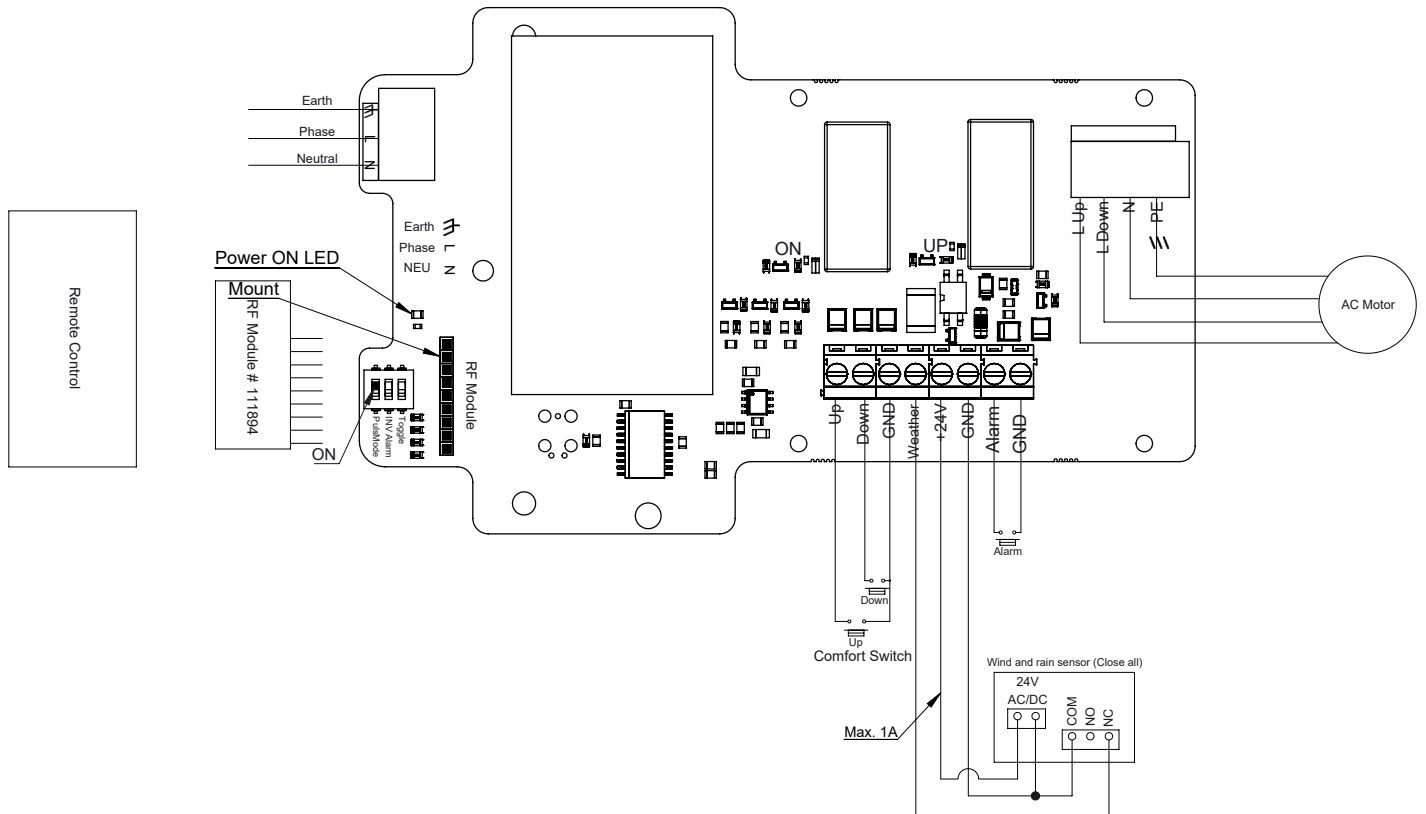

POWER SUPPLY AC CONTROLLED MOTORS

The Flex 230VAC consists of an intelligent controller for controlling, which are constructed to provide and control the operation of the opening systems for comfort and fire ventilation with 230V AC electrical opening units.

In both options it is possible to configure the Flex 230VAC with a RF-receiver PCB #111894 to make remote control possible for comfort ventilation use and for the Actulux Weather Sensors.

The Flex 230VAC unit is equipped with connection terminals for external signals (comfort, weather sensor/ close all, CMSI etc.)

Flex 230VAC

FEATURES

Power supply: 230VAC - Max. 8A

Output: 230VAC Max. 8A

24V DC for external use 24V DC / Max. 1A

Can be used with all kinds of 230VAC motors with up and down wire.

Input for Alarm Auto Reset

IP rating: IP66

Operating temperature: -15°C - +40°C

Wire range: 0.2- 2mm²

Product no.: #121200 (8A)
